

## 2021 Fermilab-Batavia Christmas Bird Count Results

On December 18, 2021, 90 birders counted every bird they could see and hear within the 15-mile circle during the 46<sup>th</sup> Fermi-Batavia CBC. Eighty-seven species were observed in the count, above our 10-year average of 84 species. We had high counts of six species and added two new species to the count: Bohemian Waxwing and Tennessee Warbler. Thank you to all the area captains and counters in making this year another successful count!
